

MORAY WEST	Issue Date	06/11/2023
WEEKLY NOTICE OF OPERATIONS	Ref: WNoO 0040	Rev: 00

Work Planned for the Period 6th November to 12th November 2023

Construction work for Moray West Offshore Wind Farm commenced on the 6th February 2023.

The key aim of the Weekly Notice of Operations is to give a global view of activities and vessels involved. Questions regarding the operations will be welcome preferably well in advance of each construction activity.

Moray West is developing the Moray West Offshore Wind Farm in the Moray Firth. The Moray West Site covers an area of approximately 225 km² on the Smith Bank in the Outer Moray Firth approximately 22 km from the Caithness coastline. The development will consist of 60 offshore wind turbines (WTGs) (with a total capacity of approximately 882 MW) and two Offshore Substation Platforms (OSPs) with associated subsea WTG inter-array cables and an OSP interconnector cable. The generated power will be transmitted to the grid via two subsea export cable circuits that will come ashore at Sandend Bay, which is located on the Aberdeenshire coast at Broad Craig near Sandend Bay, approximately 65 km south of the Moray West Site. There are two underground cable circuits currently under construction from the landfall at Broad Craig to Whitehillock near Keith in Moray where the Moray West onshore substation is under construction. There are also further underground cables being installed between Whitehillock substation and the existing Scottish Hydro Electric Transmission Blackhillock substation. The Moray West offshore development boundary is shown in black on Figure 1 below. Details of location of work activities within this area will be provided as work progresses.

WEEKLY NOTICE OF OPERATIONS	Ref: WNoO 0040	Rev: 00

Figure 1 - Moray West Offshore Development Boundary

It is currently anticipated that weather permitting offshore construction works will be carried out year-round and on a continuous basis (i.e., 24 hours working, seven days a week) unless notified otherwise.

Moray West Marine Coordination Centre in Fraserburgh is manned 24 hours, 7 days per week.

The current construction works are as follows:

•

2. Ongoing Works

2.1 Monopile Installation Activities

Scope of works involves installation of Monopiles. This week's activity involves completion of monopiles N09, L12 and L08. L08 requires driving with the Vibrohammer so, as such, requires completion of commissioning of Vibrohammer which is now onboard. Installation locations per attached sketch:

MORAY WEST	Issue Date	06/11/2023
WEEKLY NOTICE OF OPERATIONS	Ref: WNoO 0040	Rev: 00

Figure 2 – Monopile Installation w/c 06/11/23

Monopiles will be installed through pre-installed scour pads and driven to depth using impact hammer. Following successful installation of Monopiles, a temporary navigation light structure will be installed on the top of each monopile. Vessel being utilised is Bokalift 2 details as follows:

2.2 OEC Installation works – Nexans Skagerrak vessel

Nexans Skagerrak vessel is on site ready to commence works this week (weather dependant). Scope for Nexans Skagerrak vessel includes OEC-2 cable pull in at landfall, cable lay, repair joint, cable wet storage outside OSP2 exclusion zone and cable trenching works on OEC -2 and OEC-1. Duration for these works is expected to be approximately 3 months.

Nexans Aurora vessel is expected to arrive to site this week to commence works for OEC-1. Scope for Nexans Aurora vessel includes OEC-1 cable pull in at landfall, cable lay and cable wet storage outside OSP1 exclusion zone. Durations for these works is expected to be approximately 2 weeks (weather dependant).

OEC - Cable installation activities recommended Exclusion Zone

*Note: these are provided as a reference, they do not fully define the complex shape of the proposed exclusion zone.

The coordinates of the work site boundary are presented in the below table:

3.2 Moray West Construction Markers

Moray West has completed the deployment of seven construction buoys around the Moray West site. The marker buoys will remain in place until after construction of the Moray West Wind Farm is complete. The co-ordinates for the as-built marker buoys are provided in the table below.

- 5. WTG Installation April 2024- October 2024

5. Guard Vessels

Kinnaird Marine Limited has been appointed by Moray West to provide guard vessels during the Construction campaign. Apart from times of extreme weather, there will always be at least one guard vessel on station during piling operations. The guard vessel's primary duty is security of the construction site by informing and warning non-construction vessels of the ongoing activities and associated Safety Zones. Mariners are requested to navigate with caution and keep continued watch on VHF Ch. 16, 87 and 73 when navigating the area.

6. General Safety Advice

Please be aware that by virtue of their mode of operation and the equipment deployed, some construction vessels will be Restricted in their Ability to Manoeuvre (RAM) as defined under COLREGs (International Regulations for Preventing Collisions at Sea 1972, Rule 3). Masters of vessels are therefore requested to maintain their vessels and gears at a minimum safe distance from these vessels of 500 metres when it is undertaking its work and showing the appropriate shapes and lights in accordance with COLREGs Rule 27.

In order to not compromise the safety of the project vessels and their crew, and each vessel's ability to undertake its contracted works, fishermen who have static fishing gears deployed within the

MORAY WEST	Issue Date	06/11/2023
WEEKLY NOTICE OF OPERATIONS	Ref: WNoO 0040	Rev: 00

defined Moray West site(see Figure 1) are requested to provide the coordinates of such deployed gears in DMS and details of whether the surface markers used are visible at all states of visibility to Alex Winrow-Griffin (Brown & May Marine) using the contact information in the Fisheries Liaison section below (Section 58 of the Merchant Shipping Act 1995).

Fishermen who have static gears deployed beyond 12 nm are reminded that static gear must be marked in accordance with Commission Implementing Regulation (EU) No. 404/2011 (https://www.gov.uk/guidance/marking-of-fishing-gear-retrieval-and-notification-of-lost-gear#marking-of-fishing-gear). Static gears deployed within 12 nm should be marked in accordance with The Marking of Creels (Scotland) Order 2020 (https://www.legislation.gov.uk/ssi/2020/168/made/data.pdf).

All mariners are requested to give all construction and support vessels a safe passing distance and contact the vessel on VHF CH16 to ascertain what distance is required dependant on their ongoing operation.

Mariners are requested to navigate with caution, to use all means appropriate to aid safe navigation as defined under COLREGs Rule 27, and keep continued watch on VHF Ch. 16, 87 and 73 when navigating the area.

Fisheries Liaison

Fisheries liaison associated with the activity will be co-ordinated by Brown and May Marine (Moray West Company Fisheries Liaison Officer). For any non-urgent commercial fishery queries please contact Brown and May Marine or Moray West's Commercial Fisheries Manager. Note that they are only available during standard office hours and may not be able to provide immediate responses. For queries requiring an immediate response please contact either the Moray West Marine Coordinator or an Offshore Fisheries Liaison Officer:
