

Notice to Mariners (NtM)

Issue Date	23 rd September 2019
Version	03
Activity Type	Geotechnical Survey

Please be advised that Moray Offshore Windfarm (West) Limited (Moray West) will have a geotechnical survey vessel working in the Moray West Offshore Export Cable Corridor (OECC) involving 24-hour continuous operations for 4 weeks, excluding weather downtime. The figure below provide details of the survey location.

There are two elements to the geotechnical survey:

- Shallow geotechnical survey (see Figure 2) commencing 25th September 2019 on the vessel 'Atlantic Discovery'
- Nearshore boreholes completion on 21st August 2019

Please be aware that by virtue of mode of operation and the equipment deployed, the vessel will be Restricted in its Ability to Manoeuvre as defined under COLREGS (International Regulations for Preventing Collisions at Sea 1972, Rule 3). Masters of vessels are therefore requested to maintain their vessels and gears at a minimum safe distance from the survey vessel of 500 metres when they are undertaking their work and showing the appropriate shapes and lights.

In order to not compromise the safety of the survey vessel, its crew, and the ability to undertake contracted works, fishermen who have static fishing gears deployed within the defined survey area are requested to provide the coordinates of such deployed gears and details of whether the surface markers used are visible at all states of visibility (Section 58 of the Merchant Shipping Act 1995) to David O'Sullivan using the below contact information.

Offshore Fisheries Liaison Officer (OFLO) contact details:

David Guy
Offshore Fisheries Liaison Officer

Tel: +44 (0) 7443 638253

Key Vessel Information

Vessel Name	Atlantic Discovery
MMSI number	355967000
Official number	8912364 (IMO)
Operating Company	Atlantic Marine / GeoForce / Tecnoambiente
Vessel Call Sign	3EBY6
Vessel mobile phone number	+44 7769 352222
Vessel email address	Discovery@atlantic-marine.co.uk
